January 8, 2014

Dick VanGrunsven, founder of Van's Aircraft, Inc. and Wally Anderson, head of Synergy Air, are pleased to announce that production of the S-LSA RV-12 will continue in 2014.

The first batch of fly-away RVs was built in Synergy Air's Eugene, OR facility during 2013. They sold almost immediately. By the start of 2014, fourteen aircraft had been delivered, including two to Lane Community College's aviation program where they proved very popular with students and instructors.

"We were interested to see where the market for an S-LSA RV-12 might be," VanGrunsven said, "and we were delighted to find that that there were several. We delivered airplanes to private owners, flight schools and even one to Sporty's, who used it for their famous Sweepstakes airplane. With this success behind us, we've committed to another batch of airplanes for 2014 delivery."

New RV-12s may be ordered in several colors. A choice of options, including ADSB, wheel fairings, and a 2-axis autopilot are available. Prices range from \$115,000 to \$123,000.

Another RV-12 is scheduled to be delivered to its new owner at the Sebring Light Sport Expo on January 16. It will be on Van's booth there until the end of the show, along with Van's demonstrator airplane. Staff from both Synergy Air and Van's will be on hand and demo rides may be arranged.

For further information on the RV-12, or any of the other designs that have made Van's Aircraft, Inc. producers of the world's most popular line of kit (and now, fly-away) aircraft, see Van's website www.vansaircraft.com or call Van's at 503-678-6545.
