For Immediate Release:

FLY AWAY IN AN S-LSA RV-12!

[\(Introductory Video\)](#)

<http://youtu.be/0xIU2QOCujk>

Van's Aircraft, Inc. is pleased to announce a new program to build completed, fly-away, RV-12s. Better yet, Van's has a working agreement with Synergy Air of Eugene, OR to manufacture the airplanes in the U.S.A.

Nearly 200 kit-built RV-12s have been completed and flown as E-LSA and E-AB aircraft, accumulating thousands of hours in the hands of typical pilots. Production S-LSA RV-12s will include the benefits of this real-world flight experience, rather than just factory testing done by professional pilots.

Introductory price of the completed airplane is targeted at \$105,000. Standard equipment will include the Rotax 912ULS engine, Dynon Skyview EFIS (which includes a Mode S transponder and GPS), Garmin SL-40 comm radio, Flightcom stereo intercom, 406Mhz ELT, Flightline interior, and LED lighting for night flight. Options will include wheelpants, ADS-B, a two-axis autopilot, premium paint finishes and Oregon Aero seats and interior.

Synergy Air is building an initial production run of twelve (12) aircraft to define and codify the production process. We plan to offer these 12 aircraft as "Signature Edition" models that will include all options at an introductory price of \$115,000, F.A.F.

Van's is working to establish a network of Service Centers to maintain and repair the RV-12.

We plan to begin accepting orders before the end of November 2012, and expect initial deliveries in early 2013. Those interested in reserving a delivery position may contact Van's at the AOPA Summit (Oct 11-13) or contact us at the factory in Oregon.

Van's Aircraft, based in Aurora, OR, is the world leader in the kit airplane industry, with almost 8,000 RVs flying around the globe. The company produces high quality, accurate kits for over 500 complete airplanes each year, using state-of-the-art design and manufacturing technology.

Synergy Air is a well-established company providing instructional seminars, videos, and builder assistance to complete kit airplanes, located at the Eugene airport.
