## **BEFORE YOU ORDER AN RV-12, PLEASE READ THIS!**

### **Philosophy**

The RV-12 Kit was designed to be licensed as an Experimental Light Sport aircraft (E-LSA). While it is also eligible for licensing in other categories such as Experimental Amateur-Built (E-AB) or under other rules in countries outside the jurisdiction of the FAA, we strongly emphasize that the RV-12 is the product of careful design and extensive testing. From the spinner to the rudder it is a fully integrated system. We do not believe it is in the best interests of an RV-12 builder to delete, substitute or modify any component in the kit.

***Bottom line: Build it exactly as it is designed and supplied...we know you will love it.***

### **Licensing Requirements (E-LSA)**

If a builder intends to license their RV12 as an E-LSA, they will be required to supply a completed Form 8130-15 (Light Sport Aircraft Statement of Compliance) to the FAA at the time of licensing. The completed Form 8130-15 is supplied to the builder by the manufacturer (Van's Aircraft, Inc.) only after the builder has purchased all of the RV-12 sub-kits in their complete form. Van's Aircraft, Inc. is unable to issue the Form 8130-15 Statement of Compliance unless every component of the kit (including powerplant and propeller) has been purchased through Van's Aircraft.

***Bottom line: If you plan to license your RV-12 as an E-LSA, you cannot delete kit components.***

### **Credit for Deletions (deletions are not allowed on E-LSA kit purchases)**

Each complete kit is designed, produced, sold, crated and shipped in a manner that optimizes efficiency and the value of the kit. Kit component deletions result in reduced efficiency and increased costs. Consequently, the credit allowed for deleted components is adjusted to reflect the discounted price of the component when it is included as part of the complete kit.

***Bottom line: You will receive less than retail credit for deleted kit components (including the engine and propeller).***

### **Returns Policy for RV-12 Components**

RV-12 builders who choose to return or delete kit components will not receive a Form 8130-15 and will not be eligible to license their RV-12 as an E-LSA. Van's standard return policy and restocking fees will apply to RV-12 components. A customer who deletes or returns components will be required to fill out, sign and return a "Non-Standard Kit" affidavit prior to shipment of their kit receiving credit for a return.

**THANK YOU FOR YOUR INTEREST. WE HOPE YOU ENJOY YOUR RV-12!**
