Combined Engine and Propeller Package Discount

Van's Aircraft, Inc. is proud to be able to offer a discount to builders who simultaneously buy an engine and propeller.

This discount is applicable on "bundled" purchases where an Experimental Lycoming engine is purchased in conjunction with a Hartzell, MT or Sensenich propeller direct through Van's Aircraft, Inc. The engine and propeller must be installed on the corresponding airplane as outlined in our OEM agreements. Please see other applicable restrictions on the engine and propeller order forms.

This one-time \$1000.00 discount is available only to RV builders with a Van's customer number and can only be allowed if both the engine and propeller are ordered simultaneously.

The order forms for both propeller and engine must be received together, accompanied by the appropriate 25% deposits, and must include a completed copy of this form. The discount can only be applied to the exact propeller and engine models listed on the order forms. Special order engines and propellers are not eligible, nor are customers who have already obtained an OEM engine or propeller.

Builder Name: _____

Customer Number: _____

RV Model: _____

Engine Type: _____

Propeller Type: _____

Please apply the \$1000 discount to my combined **Engine and Propeller Package**.

I certify that these products will be installed on the airframe customer number above.

Eve phone		

Van's Aircraft, Inc. has an OEM agreement with Textron Lycoming that allows us to offer factory-new engines at very favorable prices. This agreement has several requirements:

- Engines are available only to RV builders with a Van's customer number and must be installed on the corresponding airplane.
- Builders must have purchased, or have on order, all kits through the Finishing Kit for that customer number.
- Only one engine per Customer Number may be purchased
- Only the models listed are available.

Certified engines have all the certifications necessary to install them in a production airplane. **Experimental engines** are functionally and mechanically identical, but do not have the certifications, which are not required for airplanes licensed in the Experimental category.

All engines are equipped with roller tappets, dual magnetos, ignition harness, fuel pump, starter, vacuum pump drive, prop governor drive, and carburetor/injector. Alternators, exhaust systems, vacuum pumps, governors, etc. vary according to aircraft type and *are not supplied* with new engines.

Van's does not maintain a stock of engines. A 25% **non-refundable** deposit is required with order. **Full payment**

must be received before shipment. If full payment is received at Van's 30 days before the scheduled ship date, items will ship directly to the customer from the factory. Freight charges are collect.

- **PRICES SUBJECT TO CHANGE WITHOUT NOTICE.**
- **FORM MUST BE SIGNED & INCLUDED WITH ORDER.**
- **WE CANNOT SHIP UNLESS THIS FORM HAS BEEN COMPLETED.**

CERTIFIED ENGINES (v=vertical h=horizontal fp=fixed pitch cs=constant speed)

Part no.	HP	Induction	Prop type	Cylinders	Price
O-320-D1A	160	v	fp/cs	4	\$25,505.00
