- Sensenich has developed a ground-adjustable, composite blade propeller and spinner specifically for the RV series. It is a 72" diameter 2-blade unit that uses the Sensenich Pitch Setting Gage System to easily and accurately change the pitch of both blades. It is designed to fit (I)O-320 & (I)O-360 150-180 HP Lycoming engines. It is not suitable for larger 200HP engines. The propeller has been tested and shown compliance with ASTM specification F2506.
- Propeller blades are black with white tips. The spinner is made of carbon fiber/fiberglass and is supplied with blade cut-outs and necessary hardware.
- The propeller is supplied with a 2.25" crankshaft spacer. Early RV cowls intended for fixed-pitch props may require a 4" spacer. For these, or for (I)O-320 engines with 3/8" crankshaft lugs, order the prop without a spacer. Suitable spacers are available from Saber Manufacturing ([www.sabermfg.com](http://www.sabermfg.com)).
- NOTE that the standard Van's 13" spinner will *not* work with the Sensenich Composite propeller. Those ordering this prop should delete the spinner from their Finishing Kit orders. Currently, there is no available spinner option from either Van's or Sensenich for RV-3/4 aircraft using the 12" spinner.
- Shipping in the U.S. is included. International shipping at extra cost. Prices subject to change without notice. Customer instigated delays may result in price increases.
- Full payment must be received before shipment.

THESE ITEMS WILL BE INSTALLED IN MY RV- \_\_\_\_\_
