ATTENTION, REPEAT OFFENDERS

We would like to feature builders who have built more than one RV in new promotional material. If you'd like to see your handiwork in our info pack, and perhaps online, let us know.

Here's what we need:

Photos of the airplanes – really good color photos. These may be prints or digital photos. If they are digital, they should be large enough to remain sharp at 5-6" width. This will require a file size of about 2.5 – 3 meg.

Many email programs will choke on files this size, so it is best to submit digital photo on a CD. These photos must be in focus, uncluttered and show the whole airplane (preferably finished --airplanes look a lot alike before the paint goes on). Best would be photos including the happy builder. Family and dogs are good, too.

Personal information – builder's name, home town, names of all the people appearing in the photos and brief notes about when the projects were finished, any special features, and thoughts about the project/airplane. We're not looking for gushing testimonials – you've already paid us a tremendous compliment by buying a second airplane – but a few thoughtful words about what the RV experience has meant to you.
